## UGA Player Performance Ranking Event Agreement and Policy

Throughout the Golf season the UGA shall maintain and administer a points list in which players can be awarded points for participation and finishes in UGA championships, USGA championships, select local events, and various other regional and national events. From the final standings, the UGA Competitions committee will select players to represent the association in the different traveling teams.

The events to be awarded points are selected by the UGA Competitions committee. The UGA will take various factors into account such as location, date, strength of field, and exclusivity of the tournament. If a local club is hosting an event and would like to receive UGA PPR points they must meet the following criteria:

1. The tournament cannot overlap with any dates for UGA Championships.
2. If the event is flighted, it must have a minimum of 16 players competing in the championship flight, which should be selected within reason (**HI of 7.0 and below, etc.**). All players that wish to play for PPR points must play from the championship flight tees.  
\*\*If you fall below these requirements please contact the Competitions committee for permission.
3. All players within the event must have a verifiable and active USGA Handicap Index; only UGA members are eligible to receive points. The individual tournament committees are responsible for acquiring the GHIN numbers from players. The UGA will not provide the GHIN numbers.
4. ***Complete results from all flights must be entered into Golf Genius within 2 business days of the completion of competition. No other forms of submission will be accepted. An account will be set up for each club, if you have any questions on the use of this software please contact Easton Folster at the UGA.***
5. Tournament scores from all flights **must** be posted no later than two business days after completion of the tournament.
6. Value of such awards may not exceed the limit of \$750 as set forth in the USGA Rules of Amateur Status.

Golf Genius is available to golf courses with no cost and will be provided. Golf Genius support will be provided by the UGA. Golf Genius can run reports and post scores to handicaps in less than 10 minutes.

\*\*Please note that if the Competitions committee feels that an event does not meet any of the above set criteria including strength of field they reserve the right to revoke the events point status even after completion of the event.
